2 Introduction

Statement of Purpose: Web page/storefront that allows store owners to post products for sale and customers to purchase from.

Detailed Description: The web storefront provides an online platform for customers and sellers alike to complete transactions for goods. Buyers will be able to view items from the site, and make purchases. Sellers will be able to add, and manage the items on their storefront.

2.1 Identification

Software Revision Tested:	4/18/18
Revision Release Date:	4/26/18

3 Test Results

The following tests produced productive results and feedback which were applied with careful consideration to the improvement of our project.

3.1 Test Case 1 Results

Description: Test the checkout process for the user when items are present

Bugs Found:

- 1) Browser Specific Bug: If user is on Firefox or Internet Explorer, the purchase button does not work.
 - a) Status: open
 - b) Build found: 1.0
 - c) Software version: 1.0
 - d) Hardware version: 1.0
 - e) Web Browser(s) tested: Firefox, Internet Explorer, Chrome, Edge
 - f) Perceived severity level: Severe
 - g) Requirements failed: *RID-032*
 - h) Enhancement: No

Steps to Reproduce:

- 1) Use Firefox or Internet Explorer
- 2) Navigate to a store
- 3) Try to click the purchase button

Build to Fix: TBD

3.2 Test Case 2 Results

Description: Tests if Store Owner is able to modify an existing product.

Bugs Found:

- 1) Parsing error when recalling previously set information. Everything after a whitespace is not shown.

Status: open

- a) Build found: 1.0
- b) Software version: 1.0
- c) Hardware version: 1.0
- d) Web Browser(s) tested: Firefox, Internet Explorer, Chrome, Edge
- e) Perceived severity level: Severe
- f) Requirements failed: *RID-111*
- g) Enhancement: No

Steps to Reproduce:

1. Use any browser listed
2. Attempt to modify a product as a store owner
3. See that, if the data has whitespace, any data after the white space is not auto filled into the input field.

Build to Fix: TBD

3.3 Test Case 3 Results

Description: Test if Store Owner is able to set a product's status to *hidden*.

Bugs Found:

- 1) Browser Specific Bug: If user is on Firefox or Internet Explorer, inactive button will not work
 - a) Status: open
 - b) Build found: 1.0
 - c) Software version: 1.0
 - d) Hardware version: 1.0
 - e) Web Browser(s) tested: Firefox, Internet Explorer, Chrome, Edge
 - f) Perceived severity level: Severe
 - g) Requirements failed: RID-070, RID-071
 - h) Enhancement: No

Steps to Reproduce:

1. Use Firefox or Internet Explorer
2. Sign in as store owner
3. Click on active/inactive buttons

Build to Fix: TBD

3.4 Test Case 4 Results

Description: Test if Store Owner is able to set a product's status to *active* which will make a product viewable in their store.

Bugs Found:

- 1) Browser Specific Bug: If user is on Firefox or Internet Explorer, inactive button will not work
 - a) Status: open
 - b) Build found: 1.0
 - c) Software version: 1.0
 - d) Hardware version: 1.0
 - e) Web Browser(s) tested: Firefox, Internet Explorer, Chrome, Edge
 - f) Perceived severity level: Severe
 - g) Requirements failed: RID-080, RID-081
 - h) Enhancement: No

Steps to Reproduce:

1. Use Firefox or Internet Explorer
2. Sign in as store owner
3. Click on active/inactive buttons

Build to Fix: TBD

3.5 Test Case 5 Results

Description: Clicking on view orders at Store Owner homepage will present a list of all orders related to Store Owner.

Bugs Found:

- 1) No bugs found

3.6 Test Case 6 Results

Description: Customers using the site can view a store by clicking on the “View Store” button at the landing page.

Bugs Found:

- 1) Browser Specific Bug: If user is on Firefox or Internet Explorer, inactive button will not work
 - a) Status: open
 - b) Build found: 1.0
 - c) Software version: 1.0
 - d) Hardware version: 1.0
 - e) Web Browser(s) tested: Firefox, Internet Explorer, Chrome, Edge
 - f) perceived severity level: Severe
 - g) requirements failed: RID-062
 - h) enhancement: No

Steps to Reproduce:

1. Use Firefox or Internet Explorer
2. Sign in as store owner
3. Click on active/inactive buttons

Build to Fix: TBD
